Product Features

PROVEN BIOMECHANICS

Independent movement arms and rotating handles allow for various natural arm and hand positions during the full range of the diverging motion. The proprietary ergonomic design of the slip-resistant handles optimize grip with less forearm fatigue.

DESIGNED TO GO THE DISTANCE

The over-sized steel tubing of the Diverging Lat Pulldown contributes to a more durable product while also giving one of the most popular pieces of the Resolute line a timeless, contemporary silhouette. One piece, soft rubber foot caps make the equipment easier to move and will remain in place even if kicked.

FOCUSED ON THE EXPERIENCE

The independent movement arms move in a diverging motion, providing a more natural feel, greater range of motion and variety in exercise movement patterns. Exercisers can also target the lats on one side to strengthen the large muscle that helps rotate the arm and pull the shoulder down and back.
