UPPER BODY CYCLE OPTIONAL ACCESSORIES

Optional Accessibility Accessories

Facilities seeking to maximize accessibility can choose to add one or more of our optional accessories, including hardware-free ramp platforms (UBC-RAMP), length-adjustable crank arms (UBC-ADJH), and a lumbar-supporting seat back (UBC-SBK). All optional accessories are compatible with both UBC-P and UBC-M.

For users who need more stability, add the lumbar-supporting seat back with transfer grips.

The simple hardware-free ramp platforms make it easy for wheelchair users to access the Upper Body Cycle.

Those seeking a greater range of motion can add our length-adjustable crank arms.
