

METRIKS FCE SOFTWARE

Complete the Assessment. Generate the Report.

Cloud-based software designed specifically for Functional Capacity Evaluations. Capture findings in a structured workflow, complete FCE calculations and clinical documentation, and automatically generate a comprehensive, editable Microsoft Word report.

FROM FCE TESTING TO FINISHED REPORT

1

CLINICIAN-LED TESTING

Adjust sequence, repeat trials, and add or skip tests as clinical reasoning requires.

2

STRUCTURED DATA CAPTURE

Document objective and clinical findings directly in the FCE workflow.

3

AUTOMATED REPORT BUILD

Calculations, tables and findings populate the report as you complete the assessment.

4

EDITABLE WORD OUTPUT

Review, refine and deliver a professional report in your own clinical voice.

WHY CLINICS CHOOSE METRIKS

- **Built specifically for FCEs.** A purpose-built platform for complex functional evaluation - not a generic measurement app.
- **Flexible instead of rigid.** Change test order, repeat trials, add optional or sustained tasks, and skip irrelevant sections.
- **Editable Word reports.** Keep control of wording, clinical nuance and referral-specific requirements instead of being locked into a PDF.
- **Proven in real clinical practice.** Refined for more than a decade in partnership with Upstream Rehabilitation's national network of 1,200+ clinics.
- **Multiple FCE workflows.** Supports single-day FCE, 2-Day FCE, POET and Functional Progress Assessment protocols.

THE DIFFERENCE

The software follows the clinician - not the other way around.

Metriks is designed to support clinical reasoning during the assessment while still producing consistent, defensible documentation.

"Using the Metriks platform has decreased our report writing time to almost zero."

Chris Scoma
