Intelect Mobile® 2 RPW

Radial Pressure Wave (RPW)
technology made mobile

EFFECTIVE. EFFICIENT. CLINICALLY PROVEN.*

Intelect Mobile® 2 RPW allows me to address the cause of the pain and more importantly the dysfunction. People are more interested in fixing the problem and not just masking the pain or taking medication, and RPW allows me to do just that.

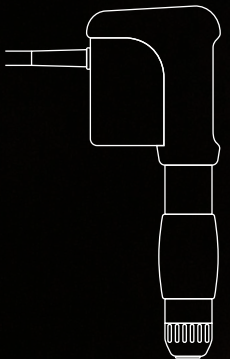

Chris Proulx, DC, PhD(abd), CSCS

Radial Pressure Waves (RPW) are acoustic waves that generate oscillations in the tissue. Intelect Mobile® 2 RPW helps reduce muscle pain and activate connective tissue, temporarily aid in the increase of blood flow, and help in the treatment of tendinitis in hips and shoulders.^{1,2}

The Intelect Mobile 2 RPW (Radial Pressure Wave) is compact and light enough to be easily carried while helping to deliver a host of features and benefits.

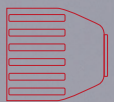

When there is a need for a powerful, yet portable RPW device in the clinic or on the sports field, the Intelect Mobile 2 RPW is an innovative choice. A lightweight and

compact design together with a quiet built-in compressor make it suitable for portable use. A user-friendly experience is at the heart of the Mobile 2 RPW's design. The simple, ergonomically laid out controls enable all of the key parameters to be easily changed. A clear, illuminated LED display removes ambiguity when monitoring pressure, frequency and number of pulses. Pulses can be initiated via a trigger button on the handpiece.

D-ACTOR®* Applicator

The patented technology of the D-Actor® applicator is designed to aid in energy transmission at high frequency and intensive use. The therapist can easily connect a large choice of transmitters.

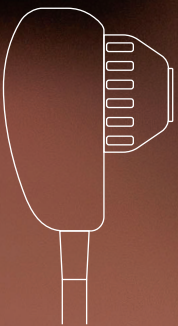

Ro40
0.38 mJ/mm²
0 - 35mm

D 20-S
0.48 mJ/mm²
0 - 50mm

Standard D-ACTOR®* Transmitters

V-ACTOR®* Applicator

The V-ACTOR®* applicator is used for vibration massage therapy. When applied to tissue, the vibration pulse can help improve microcirculation, and enable elongation of fasciae and muscle fibers. It can also help to restore normal muscle tone.
