

# RecoveryTherm™

## Hot & Cold Vibration Knee

Precise cold, heat, and vibration for advanced knee therapy.

### Contrast therapy for enhanced relief.

RecoveryTherm™ Hot & Cold Vibration Knee is the most advanced all-in-one device that seamlessly combines heat, cold and vibration therapy to optimize recovery and knee rehabilitation.

### Precise cold, heat, and vibration. All in one.

With cold therapy, manage pain and inflammation. To reduce tension and aches, apply heat. And to maximize effectiveness, try vibration for increased blood flow.

### Cryothermal Technology™ and Germanium Recovery fabric.

Cryothermal Technology™ creates direct skin contact with the thermal alloy for fast cooling, heating and effective contrast therapy. Germanium fabric naturally emits far infrared light to help regulate temperature, increase circulation and enhance the body's natural healing process.

#### Key Features:

- Three built-in treatment programs including heating, cooling and contrast therapy
- Three modes of vibration for independent use or combined with other treatments
- One size fits all design featuring Cryothermal Technology™
- Removable battery compatible with other RecoveryTherm products
- 60 minute battery life

#### What's Included:

- RecoveryTherm Hot & Cold Vibration Knee device
- Removable battery
- Soft case
- Type-C charging cable and power adapter
