

Push[®] ortho Ankle Foot Orthosis (AFO)

Recreates natural gait

- Lifts foot in swing phase and controls foot stability in stance phase of walking
- Allows natural movement of toes and forefoot
- Supports both sides of the ankle, controlling inversion / eversion
- Secures foot to orthosis, allowing a wide variety of shoe styles
- Serves as night splint, if desired
- Can be machine washed on gentle cycle at low temperature
- Must be custom fitted by a trained professional

Indications

- Drop foot with intact plantar flexion (ability to move foot downward)

Contraindications

- Loss of plantar flexion
- Moderate to severe spasticity
- Extreme foot deformity

Measuring / Sizing

Measure around the ankle as shown.

Please note that you should consult a trained professional for fitting and customization. BraceLab cannot accept brace returns that have been worn or altered.

Sizing: Right or Left Ankle

SIZE	INCHES	CENTIMETERS
